Notification: Statement on Impact of Terrorist Attacks in Israel

Dear Valued Customer,

Israel recently experienced an unprecedented terrorist attack on its land and people. Our first priority is to ensure all our employees are safe and protected. Our second priority is to maintain business continuity for all our global customers who depend on Aitech for solutions.

As of Tuesday, October 9th, Aitech's Israel office reopened for normal operations. Aitech Israel is at normal production capacity, and we are planning to deliver our solutions on the dates we've committed. We will do our best to maintain our schedule, and work with our subcontractors to support them to maintain business continuity, as well. We will remain vigilant on the current security situation in Israel. If our employees are at risk, we may initiate a temporary shutdown of our facility. We will notify you if a temporary shutdown is required and if it will affect our delivery schedule.

Aitech's other facilities in India and the United States, continue to operate without interruption. Our products and solutions that are built in the US will continue uninterrupted.

If you have any questions, please reach out to your business development contact, your program manager or customer service for additional information or latest status on your deliverable.

We thank you for your words of support and look forward to our continued work supporting your rugged system needs.

Best Regards,
Yaron Mund
CEO
